NOTE TO THE READER

This publication contains several tables showing U.S. trade by country and/or country suppliers. These tables list the major U.S. trade partners, either across all product groups or, in the case of the tables showing specific product detail, for the particular product group represented.

Major U.S. trade partners are defined as those countries having the greatest dollar volume of trade with the United States on a current year-to-date basis. As such, the mix of countries represented in any particular table may change from one month to another. This format is designed to provide the reader with data on the most significant U.S. trade partners on a current basis. It is not designed to track U.S. trade with a particular country on a month-to-month basis.

In most of these tables, U.S. trade with the top ten trade partners is shown, with the countries organized in descending order of volume. The table indicating GSP imports includes only the top eight countries, however, due to space considerations.

In the tables that show specific product detail by country, products are listed either by HTS or Schedule B numbers. These numbers are subject to occasional change by the International Trade Commission (ITC). The reader should refer to pages 2-28 for the corresponding product descriptions.

The data contained in this publication are available free or for a nominal fee from the Federal Government.

ELECTRONICS FOREIGN TRADE

AUGUST 1992

Import products are identified by HTS classifications issued by the United States International Trade Commission. Export products are identified in accordance with the classifications of Schedule B, Statistical Classification of Domestic and Foreign Commodities Exported for the United States, which is available from the U.S. Department of Commerce.

Import and export data for defense and space electronics are included in appropriate product categories. Foreign military sales shipped on government bills of lading are not included.
